Ecommerce API Tokens

An API token is used to integrate online payments with your ecommerce website or app. [Learn more](#)

Don't share API tokens with parties you don't trust or with developers building apps for the Clover App Market.

Tokens

Token name	Integration type
Clover eComm Iframe	IFRAME
Public token c8ebd608f36def93efb0d4d1485080ed	<button>Copy</button>
Private token e06ec7d2-9e51-dfac-4f2a-6dcf86bd0b65	<button>Copy</button>

Recaptcha Settings

reCAPTCHA is a test to tell valid users and bots apart. It blocks automated software and prevents spamming while giving your customers a sense of security.

Use reCAPTCHA for all transactions made through iFrame embedded page

Please note: In order to use reCAPTCHA with the Clover-hosted iFrame, you will need to share your merchant ID with Clover for the integration. You can find instructions on how to do that [here](#).
